Animation...

What you would need...

- ▶ pdf file with the animation
- ▶ Every page is a frame of the animation.
- ▶ Animation is formed by the range of pages in the pdf file.
- ▶ One way to draw such animations is using Ipe:
<https://ipe.otfried.org/>

The code...

```
\usepackage{animate}  
...  
\animategraphics%  
    [autoplay,width=0.4\linewidth,loop]%  
    {2}% Frame-rate per second  
    {figs/depth}%  
    {1}    % start frame  
    {20}
```
